

MBTA COMMUTER RAIL POSITIVE TRAIN CONTROL PROGRAM UPDATE

Advisory: Drill Work on Commuter Rail Line September 9-10 & 16-17

Work on Needham Line will occur 6AM-6PM

MassDOT and the MBTA are undertaking federally mandated Positive Train Control (PTC) infrastructure installation which will increase the safety of commuter rail customers and would like to advise the community of upcoming daytime drill work within the right-of-way along the MBTA Needham Commuter Rail Line. Due to the equipment necessary to perform this work, high noise levels can be expected.

On the weekend of September 9-10, 2017, the PTC Systems Integrator Ansaldo STS USA, Inc. will commence rock drilling activities throughout the Needham Line during daytime work hours of between approximately 6AM – 6PM. If this work is not completed during the weekend of September 9-10, the work will continue the weekend of September 16-17, 2017.

For further information regarding the PTC work schedule please visit the [MBTA PTC program website](#).

Thank you in advance for your cooperation. We appreciate your patience as the MBTA takes this important step in making the railways safer for customers with the implementation of the PTC program. Should you have any questions please feel free to contact the PTC program at 617-721-7506 or PTCProgram@mbta.com.
